

I can confirm that the substances listed on the SVHC list are not contained in any PAR products and thus the supply of our current range should not be affected in any way.

As a company, we are in constant dialogue with all our suppliers in order to keep fully briefed as the legislation progresses.

Over the coming months, we are looking to develop a dedicated section on our website to deal with all aspects of legislation, which will include downloadable statements on all past and present directives. Please visit [www.par.gb.com](http://www.par.gb.com) to keep fully up to date.
